Contact us at memocool@naladex.com in order to get free coupon codes that you could offer inside your review to all your visitors. With this coupon codes the user will be able to get 1000 Memocoins for free, to spend on items inside MemoCool.

A GOOD EXAMPLE OF A UNITY “NON-GAME” APP

MemoCool has been fully developed with Unity, a platform for application development, mainly intended for games.

The challenge was to create an app where we could combine the usual functionality of a "non-game" app, plus the visual experience offered by a game engine. Unity was the key to achieve this and we're proud to say that we haven't yet found precedents of similar apps in its category.

ABOUT NALADEX

Naladex has its beginnings in 2013 as a small collaboration between two friends for creating mobile apps. As a result of this shared hobby, and after countless sleepless nights, we could consolidate as a company, located in Murcia, Spain.

Since then we work on designing useful applications, but also develop tools that stand out for their visual content, in order to encourage users to take full advantage of them.

In Naladex we spent a lot of effort to get each project stand out visually, taking into account the latest trends in design or sometimes fleeing from them as far as possible, in order to achieve a result unique.

More than 1,000,000 users worldwide enjoy applications such as ListOn or MemoCool, with 4.2 stars in Google Play.
